

THE DUX Axion

COMFORT IN ACTION

The DUX Axion combines the benefits of the DUX sleep system with the elevation capabilities of an adjustable bed. Its multi-layered Swedish steel springs offer the perfect combination of stability and support, while its dynamic, silent motor helps you settle into just the right height and angle.

EXPERIENCE THE DUX DIFFERENCE

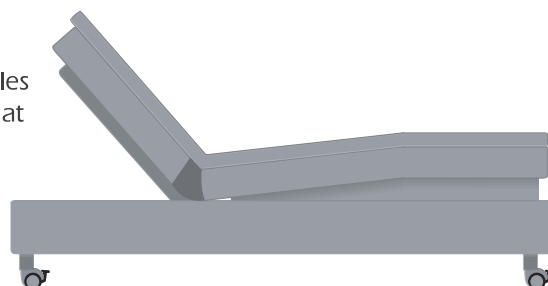

>> Swedish Steel Springs

At the heart of the DUX Axion are Swedish steel springs. More springs provide better contouring for your body, reducing pressure points which can help improve circulation.

>> Power To Spare

A special built in power reserve enables you to return the bed to its original flat position in case of a power outage.

>> Fingertip Control

The DUX Axion's elevation can be easily adjusted with an ergonomic and user friendly handheld remote control that features soft-touch night glow buttons.

>> Extra Support

At DUX we offer you four top pads to choose from as an integral part of your DUX Axion. These include the deeply tufted Xtandard, Xupport and Duxense top pad.
